Movantech

Cloud & Data Center Solutions

Scalable, secure and cost-effective cloud and data center solutions that power digital journeys.

Modern Infrastructure

High-performance infrastructure built for reliability and scale.

Amazon Web Services

Leverage the power of AWS for secure and agile solutions.

Hybrid Solutions

Seamlessly integrate on-premise and cloud environments.

Backup & Disaster Recovery

Protect critical data and ensure business continuity.

Virtual Datacenter

Optimized virtual environments for maximum efficiency.

Cloud Migration

Smooth and secure migration to the cloud.

Managed Services

End-to-end monitoring and management for peak performance.

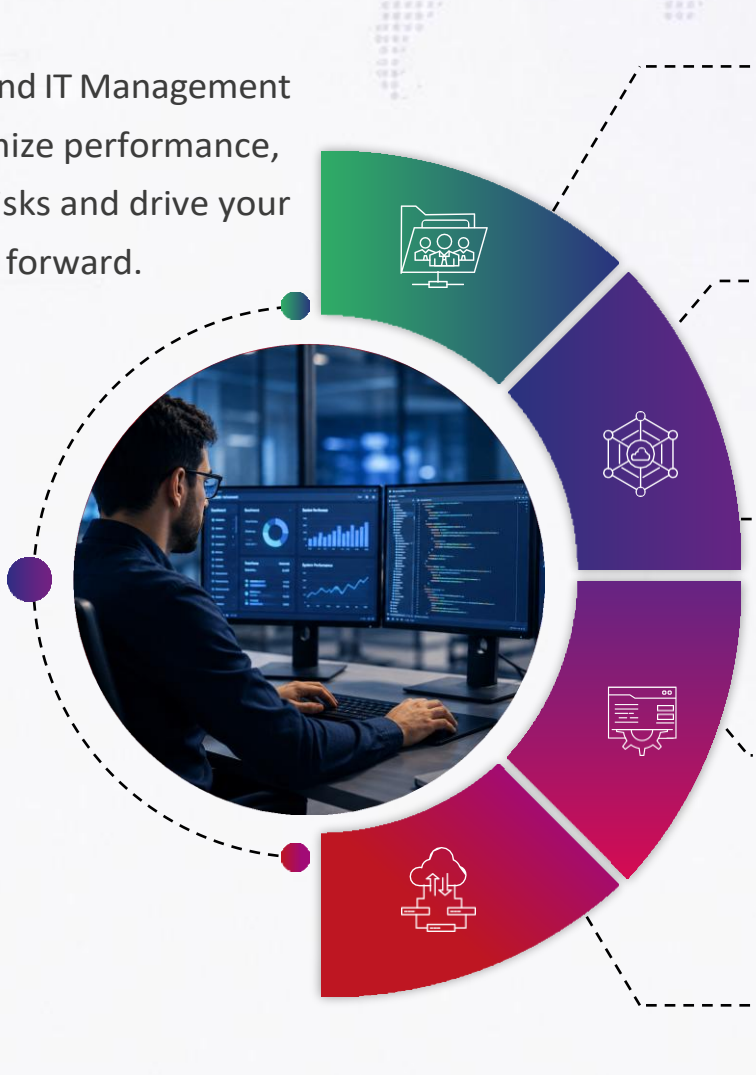

Cloud Optimization

Optimize costs and performance for better outcomes.

Movantech

Managed IT Services

End-to-end IT Management to maximize performance, reduce risks and drive your business forward.

Assess

Understand your environment and business needs.

Design

Build the right IT solutions and roadmaps.

Implement

Deploy with precision and expertise.

Monitor

24/7 monitoring and proactive support.

Optimize

Continuously improve performance and reduce costs.

- Proactive Support
- Minimize Downtime
- Improve Efficiency
- Reduce Risk
- Lower IT Costs

Movantech

Device Lifecycle Management

From procurement to Secure Disposal - Complete Control Across the Device Lifecycle.

Movantech manages enterprise devices throughout their complete lifecycle - from procurement and deployment to policy-driven management, security, refresh and secure retirement.

The Complete Device Lifecycle

01 Procure

Source and provision Devices according to business requirements and approved standards.

02 Configure

Prepared Devices with approved operating systems, applications, configurations and security baselines.

03 Enroll

Register devices into MDM/UEM platform and apply the required policies and roles.

04 Manage

Manage Devices according to IT policies SOPs and security standards.

05 Refresh

Monitors Devices health, performance and lifecycle status to ensure any necessary upgrade or critical replacements.

06 Retire

Securely decommission recover, backups and dispose off devices as given and local origin defined standards.

What We Manage

Laptops & Desktops
Enterprise computers, Workstations and business endpoint devices.

Monitors & Displays
Professional Monitors, Displays and workplace peripherals.

Mobile Devices
Smartphones, tablets and mobile computing devices.

Network Equipment's
Access points, switches and other connected infrastructure.

Servers & Datacenters
Servers, Racks, Storage and other Infrastructure equipment's.

IT Peripherals
Printers, Keyboard mouse and other computing hardware.

Warranty & Support Coordination

Coordinate warranty claims with users and vendors, including claim submission, RMA tracking, replacement coordination and resolution follow-up.

Movantech

Lifecycle Services
& Asset Management

Visibility, Security & Control Across Every Device

Movantech provides comprehensive device lifecycle services and advanced MDM-based management to ensure your devices are secure, compliant and always ready for business.

1 Device Onboarding

Asset Registration
Every device is recorded with key information such as asset ID, device type, configuration and assigned user/location.

Configuration & Imaging
Standardized operating systems, applications, configurations and security policies are prepared before deployment.

Asset Tagging
Devices can be tagged and associated with organizational asset records for easier tracking and accountability.

2 Deployment & Support

Deployment
Device installation, user assignment, configuration and workplace readiness.

Maintenance
Troubleshooting, hardware replacement, warranty coordination and technical support.

Inventory Control
Maintain visibility of deployed, available under repair and retired assets.

3 Security Throughout the Cycle

Secure Configuration
Devies are prepared according to defined security and organizational requirements.

Access & Endpoint Controls
Support integration with Endpoint Management and organizational security controls.

Data Protection
Protect organizational information throughout the device's operational lifecycle.

Secure Retirement
Devices are securely decommissioned with appropriate Data Sanitization before disposal and reassignment.

4 Refresh & Retirement

Assess
Device health, age, performance and business requirements.

Refresh
Upgrade or replace devices based on lifecycle requirements.

Migrate
Transfer users, applications and required data to replacement devices.

Retire
Decommission , sanitize and dispose/redeploy the old equipment.

5 Managed According to Your Policies & SOPs

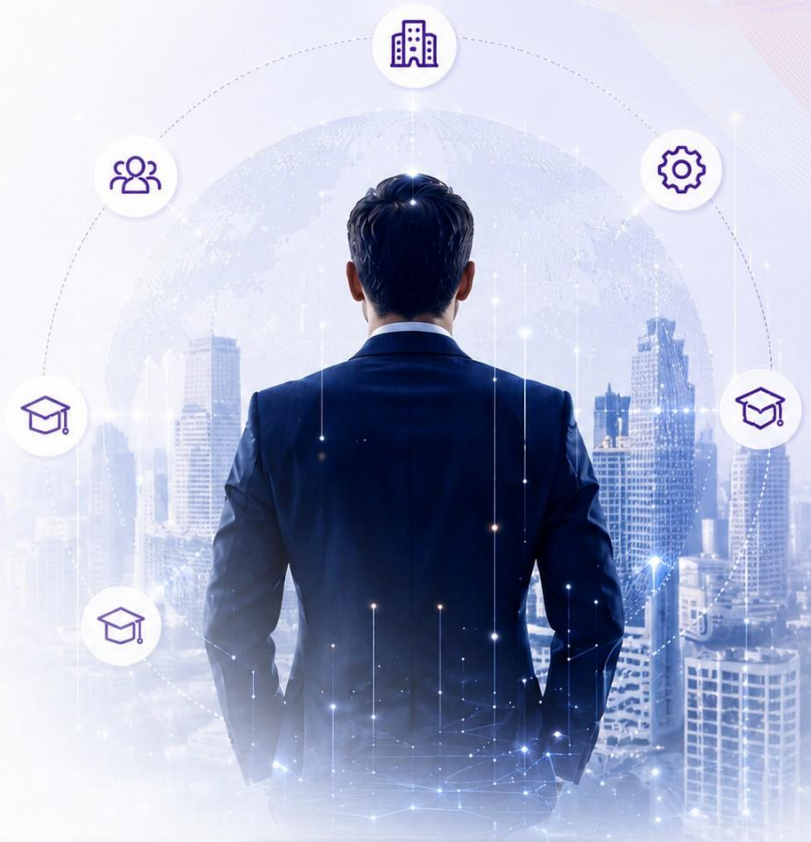

Customer Policies › SOP & Configuration Baseline › MDM/UEM Enforcement › Monitoring and Compliance

Microsoft Intune · ManageEngine · Microsoft Endpoint Manager · mosyle · jamf

Built for Corporates, Schools & Institutions
Manage every device from deployment to retirement with centralized MDM, defined policies, SOP-driven operations, security controls, and complete lifecycle visibility.

Movantech

Industries We Serve

End-to-end IT Management to maximize performance, reduce risks and drive your business forward.

Healthcare

Empowering healthcare providers with secure, reliable and scalable IT Solutions to improve patient care.

Manufacturing

Driving efficiency and innovation with smart IT Solutions for modern manufacturing environments.

Enterprise

Enabling businesses to scale, collaborate and succeed with robust and future-ready IT solutions.

Government

Supporting government agencies with secure, compliant and citizen-centric digital transformation.

Pharmaceutical

Delivering technology solutions that accelerate research, ensure compliance and improve lives.

Education

Enhancing learning experience through innovative, secure and connected IT environments.

Movantech

Our Growth Journey

From a strong foundation in the UAE to an expanding global presence, Movantech's journey reflects a commitment to innovation, excellence, and customer success.

2012

Founded in Sharjah, UAE

Movantech Systems was established in Sharjah, UAE with a vision to deliver reliable enterprise IT infrastructure, tech procurement, and business solutions to organizations across the region.

2018

Expansion into India

Expanded operations into India to strengthen sourcing capabilities, technology partnerships, and regional support services for growing business demands.

2019
